Frontend Assignment - Whatbytes

---

1. Home Page (/) – Product Listing

Layout:

Header:

- Logo on the left
- Search bar in the center
- Cart icon (with badge) and profile/avatar on the right

Main Section:

Sidebar (left):

- Category filter (checkboxes or pills)
- Price range slider
- Brand filter (optional)

Product Grid (right):

- Responsive grid: 3 columns on desktop, 2 on tablet, 1 on mobile
- Each product card includes:
    - Image (cover)
    - Title
    - Price
    - Quick "Add to Cart" button
    - Optional: Rating stars

Footer:

- Copyright information
- Social media icons

---

2. Product Detail Page (`/product/[id]`)

Layout:

Image Section (left):

- Image carousel or large product image

Details Section (right):

- Product title
- Price
- Description
- Category
- Quantity selector
- "Add to Cart" button
- Optional: Reviews section

---

3. Bonus (Optional) – Cart Page (`/cart`)

- List of added products
- Quantity update controls
- Remove item option
- Price summary

Logic to Implement

- Filtering logic for categories and price
- Search filtering with string matching
- URL-based filters (e.g., `?category=electronics&price=0-1000`)
- Client-side state management for the cart (using React Context or Zustand or Redux)
- Dynamic routing with Next.js for product detail pages (`/product/[id]`)
- Conditional rendering (e.g., show a message when no products are found)
- Persist cart state in `localStorage`

Suggested Styling Stack

- Tailwind CSS for rapid and responsive UI development
- Icons can be sourced from `lucide-react`

Rules to be strictly followed

- **Push your code to a public GitHub repository with logical, feature-based commits.** Avoid pushing all changes in a single commit. Commit incrementally as you build features (e.g., filter UI, product listing, product detail page, cart logic) to clearly demonstrate your development process.
- **Deploy your completed project to Vercel** and include the live deployment URL in your repository's README file.
- Make the UI the same as the image below (attention to detail will be checked).
- Use Next js setup for the project.
